

Safe Water. For All.

Kohler has a long history of product design and manufacturing that seamlessly blends form and function. Now, we are bringing our expertise to WaSH (Water, Sanitation and Hygiene) initiatives worldwide to help solve health and hygiene problems, such as limited access to safe drinking water.

In our research into providing safe drinking water to all, we realized there was a tremendous opportunity to improve both the performance and design of the water filters currently available in developing nations. So we challenged our industrial designers and engineers to create a better filter. We believe they did just that with the KOHLER® Clarity™ system.

KOHLER Clarity is about solving a problem.

KOHLER Clarity is incredibly simple to use and maintain. Backed by Kohler's commitment to quality, it's made with Kohler's philosophy of fusing aspirational design and technology. And, most important, Clarity helps partners provide the quality products people want.

- **Designed to meet WHO (World Health Organization) water quality standards**
- **Filters up to 40 liters per day***
- **Filters up to 2 liters per hour***
- **23 liters total capacity**
(11 L dirty, 12 L clean with safe storage)
- **Easy to assemble and clean**
- **Nestable for shipping as individual filters or in bulk**

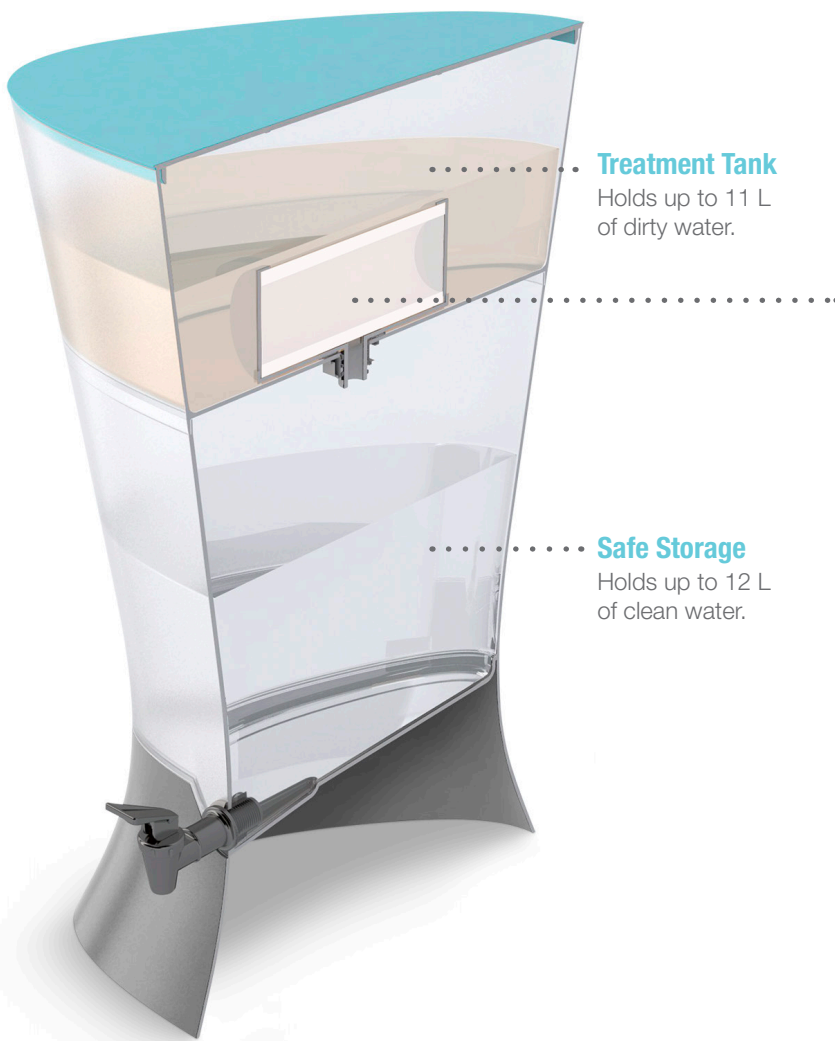

Partnering to Scale

From its inception, Clarity is the culmination of collaborative expertise from leading organizations in the WaSH sector. Using extensive user-research and findings from PATH (Program for Appropriate Technology in Health), a leading global health NGO (Non-Governmental Organization), a team of engineers and industrial designers at Kohler Co. added their artistic touch to create an affordable, aspirational design. We are currently working with partners with sustainable and scalable approaches to distribution. Come join us and help empower people to take water treatment into their own hands.

“Business success doesn’t matter much if we can’t say we left the world a better place than we found it.”

-David Kohler
President and CEO

KOHLER® Clarity™ Filter Cartridge

- Designed to meet WHO standards
- Removes bacteria and protozoa
- For use in non-turbid water
- Does not remove lead, arsenic or other chemical contaminants
- Estimated life: filters up to 5000 liters
- Filter cartridge ceramic contains silver
- Dimensions: 58 mm (2.3") diameter x 135 mm (5.3") length
- Replacement filters available

Dimensions (W x D x H)
358.65 x 347.98 x 554.23 mm
