

Village Bucket Filter

VF100 VILLAGE BUCKET FILTER

KEY FEATURES

0.1 micron absolute — No bacteria, protozoa, or cysts

It's Simple — No Chemicals, No Construction, use any plastic bucket or plastic bottle, No Replacement Parts; even attach it to a tap or spigot with hose threads

Cost Efficient — One system provides clean and safe water for pennies a day over its lifetime — Produced by a Non-Profit company!

Fast Flow — supplies 1 liter every 2 minute

Easy Maintenance — Just back flush after each use

Long Lasting — with proper maintenance it can last many years for an entire family

Disaster Relief — fast solution to a clean water need

Meets and exceeds EPA standards — removal of bacteria and protozoa is at a higher “log” rate than EPA standard

BENEFITS

Saves Time

Fastest Flowrate for clean and safe water

Saves Money

Fewer trips to the Clinic; Less missing work or school

Saves Health

No more stomach ache and diarrhea; Nutrition Value of Food increases by 40%
